## 13.1

Examinations of checkwriter machines and their product can involve many facets. Limitations can be placed upon these examinations by influences such as the type of machine or document examined, the methods used to produce the items, the type of analysis requested, etc. A variety of examination techniques may be employed, including all of the examinations listed in this manual. Information provided in this procedure gives an overview of the process, considerations and instrumentation used. Analysis schemes for each case will be implemented depending upon the type of evidence presented.
